Stowers 30, Ed Walker 32 50, Road District No. 4—John Gillett labor \$30, G B Molinari 21, Samuel Hughes 5, L L Cuneo supplies 122 50, Brignoli Est Co. 6 10, W H Norton 2 50, Theodore Gebhardt 4, Jas Truscott 14, Wm. Cramer 2, C D Fraser 150.

Road District No. 5—Alfred Darling, labor \$4, Florence Gianini 6, General Road Fund—E M Gillick et al labor \$66 47.

Bridge Fund—Amador Co. Roller Mills lumber, 252 28.

Salary Fund—John Strohm, A Grillo, L Burke, D A Fraser and R H Bagley \$25 each as road commissioners.

Petitions for permits to retail liquors were granted as follows: To Rosenwald & Kahn, in Plymouth; Joseph Zeni, at Sutter Creek; J. H. Fullen and Mrs J. Ryan at Martell.

The petition of G. F. Pasquetti to retail liquors at Bunker Hill was denied by the votes Fraser, Strohm, Grillo and Bagley.

The application of R. W. Barnett to erect a farmers' telephone line in township two was granted.

The petition of John Daneri and others asking that the bounty on blue jays be increased from 2c to 5c per head was laid over until the next regular meeting.

The report of the county treasurer, hospital report, county health officer's report, statement of the license collector for the quarter, and criminal returns of Alfred Goldner, T. H. Gartlin, A. W. Robinson and W. H. L. Rose, were examined and approved.

The monthly allowance to Mrs. E. Frederickson was ordered discontinued.

Mrs M. Marcovich was granted \$6 per month for two months.

On motion the action taken at the last meeting in abolishing the Rancheria school district was rescinded, and in lieu thereof a motion was carried declaring the district suspended.

Upon motion of A. Grillo, seconded by D. A. Fraser, the following resolution was duly and regularly passed and adopted:

Whereas, the state of California is the owner of The New London Quartz

Mine, being mineral entry No. 276 and designated as lot No. 60 in sections 11 and 14, township 7 north range 10 east, by virtue of a sale and deed to said state of said property for delinquent taxes thereon;

Whereas, the taxes on said property, together with all interests, costs, penalties and expenses now amount to the sum of \$4,670.53;

Now, therefore, we, the board of supervisors of the county of Amador, state of California, hereby resolve: That in our judgment, the property so owned by the state, to wit: The New London Quartz Mine, being mineral entry No 276 and designated as lot No. 60 in sections 11 and 14, township 7 north range 10 east, is not at this time of value great enough that it can be sold by the state for a sum equal to the amount of all taxes levied upon said property and all interests, costs, penalties and expenses up to the date of such sale, and that it would be to the best interests of the state to sell the said property for the sum of \$566.70, being a sum less than the amount of taxes levied upon said property and all interests, costs and penalties now due thereon.

Superintendent Burke was instructed to make the necessary repairs at the county hospital.

The following warrants were cancelled:

School fund	1243 11
Current ex "	1664 77
Hospital "	755 80
Salary	2399 98

For the Portola festival the Amador Central Railroad will sell tickets to San Francisco and return for one and one-third fare for the round trip. Sale dates will be October 16, 17, 18, 19, 20, 21, 22, and 23. Return limit ten days from date of sale; final return limit October 31st. The S. P. Co. have given same rates.

oct. 1-2 t. J. A. McPherson, Supt.

Criminal Returns.

Township No. 1; Alfred Goldner, justice—William Ross and Mary Ross charged with felony on complaint of J. D. Mason; arraigned and bail fixed at \$1500 each to appear for examination; remanded to the custody of the sheriff.

George Markovich charged with misdemeanor on complaint of Maria Markovich; defendant plead guilty; sentenced to pay \$75 or serve 75 days in the county jail; in default of same committed to custody of the sheriff.

Joseph Trabucco charged with felony on complaint of T. S. Tuttle; arraigned and bail fixed at \$2000; remanded to the custody of the sheriff. September 26 upon motion of C. P. Vicini, the above action was dismissed.

Obren Savich charged with felony on complaint of Amelia Capor; September 21, upon motion of C. P. Vicini the above action was dismissed.

Alfred J. Phillips, charged with felony on complaint of Eliza Pascoe; warrant of arrest issued.

Joseph Trabucco charged with misdemeanor on complaint of U. S. Gregory; defendant arraigned and plead guilty; fined \$300 and to be imprisoned in the county jail 90 days or the alternative of paying \$1 for each day's imprisonment; \$390 paid.

Obren Savich charged with misdemeanor on complaint of U. S. Gregory; defendant arraigned and plead guilty; fined \$300 which was paid, and to serve 90 days in the county jail; remanded to the custody of the sheriff.

Adolphe Lamanier, charged with misdemeanor on complaint of Alexander Menard; arraigned; plead not guilty; bail fixed at \$300; later plead guilty and was fined \$10 or to serve ten days in the county jail; remanded to the custody of the sheriff.

Township No. 2; T. H. Gartlin, justice—Will Daly charged with misdemeanor on complaint of Mrs W. Gallagher; plead not guilty; trial by jury and found guilty; sentenced to pay a fine of \$20 or serve 20 days in the county jail; remanded to the custody of the sheriff.

Township No. 4; W. T. Rose, justice—A. Hoff charged with misdemeanor on complaint of T. S. Tuttle; plead guilty; fined \$25 and paid.

Township No. 4; A. W. Robinson, justice—Charles Calvin charged with misdemeanor on complaint of C. E. McKenzie; case dismissed.

MINING NOTES.

Bunker Hill.—It is reported that the clean-up of this mine for last month was over \$26,000, a yield of over \$1300 per stamp of the twenty stamp mill. The price of the stock has advanced materially, \$4 per share now being asked for it, and no anxiety to dispose of it for that figure.

Kennedy.—The underground men were started to work again Wednesday, after a lay-off of one week in order to repair the shaft. The most urgent of the repair work was done, and further work was postponed so that ore to keep the mill going might be taken out.

Ione Copper Mine.—The copper proposition came to a standstill last week, throwing about twenty five men out of employment. A number of the miners came to Jackson. The cause of the shut-down is not definitely known, but it is believed to be to sink another shaft, and equip the mine with better machinery for active operations. The miners report that there is a good body of ore there, and every indication of opening up a paying property.

A new clay bank has been opened upon the Abbot place just east of town, and teams are hauling to the railroad for shipment. Most of it goes to Oakland, it is reported.—Echo.

An effort is being made to open an iron mine near the Horton place, south-east of town. The ore is being shipped and a trial run made. There is said to be a large deposit there, and apparently of a good quality. There is no lack of almost any kind of mineral in this end of Amador county. All it wants is capital and energy to develop it.—Echo.

Chamber of Commerce Meeting

The regular quarterly meeting of the Amador county Chamber of Commerce will be held in the superior court room Wednesday, October 13, 1909, at 8 o'clock p. m.

A full attendance is requested as matters of importance are to be brought before the members.

C. P. Vicini,

President.

C. G. Heiser,

Secretary.

For a clear head, a stout heart and strong mind, De Witt's Little Early Risers, gentle, safe, easy, pleasant, little pills. DeWitt's Carbolyzed Witch Hazel Salve is unequalled for anything where salve is needed, and is especially good for Piles. Sold by City Pharmacy, F. W. Ruhser, prop.

An Advertising Proposition.

A lady named Georgia A. Shirty was before the board of supervisors last Monday with a proposition to boom the county by an advertising scheme. She is said to be a representative of the Southern Pacific Company. Her proposition was to have inserted in the Sunset Magazine a one-page advertisement for a period of one year, with the privilege of changing the article each monthly issue. The charge for this service was to be \$160 per month, making a total of \$1920 for the year. In addition to the advertising 20,000 booklets were to be printed illustrative of the resources of Amador county, and circulate them through the states of the east and middle west. The figure looks big to the uninitiated, but providing the booklet to be thrown in should amount to anything reasonable as an exposition of the county, it cannot be said to be extravagant, however, we do not believe in going to disinterested parties for such work. Amador needs advertising boosting as badly as any part of the state, but the most effective work in that direction could be had from those who are individually interested in bringing new settlers into the county. The supervisors took no action on the proposition.

Hospital Report.

The acting county physician made his monthly report to the supervisors as follows:

Admitted—Frank Vieira, 38, Portugal, malaria; George Wagstaff, 46, California, nephritis; J S King, 73, Tennessee, senility; Joseph Morris, 74, Austria, paralysis; Frank Dammovich, 46, Indiana, paralysis; A J Barkis, 78, California, senility; Alfonse Deaz, 55, California, temporary insanity; Thomas Elliott, 66, England, heart disease; Wm Carey, 69, Ireland, senility; Wm McKean, 41, California, pneumonia.

Discharged—James Clements, Wm Carey and Alfonse Deaz.

Died—George Wagstaff.
Number of patients at last report, 37; admitted during month, 10; discharged, 3; died 1; number remaining October 1, 43.

MILTON DAVIS WANTED.

Milton Davis and his brother will learn something to their advantage by communicating with Mrs W. S. Davis, East Auburn, California. The Davis boys are supposed to be mining somewhere in Amador county. Their friends will kindly call their attention to the above.

The RED FRONT JACKSON'S ONE-PRICE STORE.

We wish to announce to the people of Jackson and Amador county through the medium of the Ledger the UNPARALLELED SUCCESS we are having with our 1909 FALL OPENING SALE which commenced on Saturday, October 2nd, and will continue until October 20th, below are a few of the many bargains we are offering during this sale:—

BLANKETS

100 pairs of sample blankets, no two alike. We were fortunate in purchasing this line at great concession by taking all the manufacturer had left after filling his orders. They stand for satisfaction and economy, the quality being of the highest standard. They will be closed out at 50c on the \$1.00.

Honest Dealing is the Foundation of Our Reputation.

LET US HAVE A FAIR DEAL.

The suit of Mrs Gardella against Calaveras and Amador counties, involving the title to the Big Bar bridge property, joining the two counties, will be watched with much interest. The circumstances surrounding this suit are peculiar. The reputed owner is anxious to sell, the two counties concerned are seemingly just as anxious to buy. It is a matter of record that they are committed to its acquisition, with the proviso that the title be first settled. It is under this phase of the matter that the suit to quiet title has been brought. The taxpayers of the two counties are interested to the extent of \$8000—the appraised value of the bridge—and the costs of suit. If Mrs Gardella wins, Amador county will have to furnish one half the amount. Of course, it is the duty of the district attorneys of the two counties to defend the suit in behalf of their respective counties. It is reported, however, that they have expressed themselves as believers in the justice and legality of the plaintiff's claim. If this be so it imparts an additional complication to the case. The issue involved is purely a matter of law. Mere sentiment or sympathy should cut no figure in its determination. It is the duty of those who are entrusted with the safeguarding of the interests of the county to see that the defense is fairly and fully presented to the court. Some lawyers of repute claim that the counties cannot lose if the matter is properly presented. And the saving of \$4000 to each county is certainly worth looking after. If Mrs Gardella owns the bridge there would be little, if any, objection to its purchase by the two counties at the price stated. But there will be, and ought to be, a vigorous protest to the payment of any sum for its purchase based on a judgment by default, or on a half-hearted presentation of the defense. In such an event the blame will fall on the officials concerned, and Amador officials equally with those of Calaveras county.

A FOOLISH PROPOSITION.

A convention of mining men was held recently in Goldfield. It was supposed to be for the purpose of promoting the mining industry. Such conventions, however, are seldom of any practical value. Some of the spouting delegates seem to know about as much about the conditions and requirements of the mining industry as the traditional inhabitant of the moon. For instance, one delegate in all seriousness recommended as a step in the direction of stimulating mining, that all unworked claims be assessed at a high valuation. According to his notion, this policy would result in every owner getting to work on his claim in order to avoid the big tax for idleness, and what a wonderful revival of mining would then ensue. If the experiment were tried, it is safe to say the outcome would be just the opposite to that which he has pictured in his imagination. The policy, if applicable at all, could only apply to such claims as are patented. Unpatented claims are subject to the provision of the federal law that \$100 worth of work be done on each claim every year as a condition precedent to maintaining the right of possession. And even this requirement is found generous enough to a large percentage of locators who are mostly men of small means. With regard to patented claims the recommendation to assess an idle mine into working shape is absolutely without merit. It would mean the confiscation of many a poor man's holdings. Besides this, it is against the constitutional provision that taxation shall be just and uniform.

There is not the slightest chance that such vagaries will be put to a practical test. The tendency should be rather in the opposite direction. It is hardly possible to adopt a too liberal policy in the assessment of unproductive, or rather unremunerative mines. Mining property is unlike other kinds of investment property, and should therefore be assessed on a basis by itself. If a man buys a ranch, or a mercantile business, he can reasonably expect an income therefrom in a short time. If he puts in a crop he is pretty sure to reap a harvest. With a comparatively small outlay, he places it on a productive capacity. It is different with mining. It requires the expenditure of much labor and money to find out whether the prospect is likely to develop into a mine. In the majority of cases the outcome is disappointment—the time and money are thrown away. And yet, under the system which we have in California, just as soon as a man commences to put up improvements to prospect a mining claim, the assessor comes along and jumps up his assessment in proportion to the amount of money expended in its improvement. It is all outgo and no income, but he has to pungle up for the privilege of putting his money in a hole in the ground, that adds not one dollar to the wealth of the country unless it turns out that there is a producing mine there. This situation is a discouragement to active mining. Capitalists do not take kindly to the idea of being assessed out of their boots before they have a chance to get any return. It would make matters still worse to clap on a big assessment when the claim is idle. We believe the better way to promote mining industry is to assess all mining properties at a mere nominal value until they have reached the producing stage. After that, assess them according to the gross or net output, in about the same ratio as other producing property is assessed.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

How to Ward Off the Dreaded Scourge of Consumption.

"How can I keep from catching tuberculosis? You say we breathe a whole colony of the germs into our systems every day. Is it pure luck that keeps a man from becoming a consumptive?"

This question is often asked of physicians, who tell you how great a percentage of the population has the disease, and you wonder how to keep out of that percentage yourself. The formula is simple. Every one gets the germs into his system, but if a man's condition is healthy they can't gain a foothold.

Avoid excess of every kind. If a man drinks or smokes too much he gives an opening for the attack of the disease germs. The corpuscles which nature made for the watchdogs of the system and which normally chase down and devour the injurious germs go to sleep at the switch and lose interest in hunting.

Don't eat too much. Get all the fresh air possible. It's still free.

Sleep with your bedroom windows down from the top and up from the bottom, and open 'em as wide as possible. But avoid drafts.

If you work with a man who is uncleanly reform him gently, but firmly. It may be a man's privilege to go unwashed, but no man has a license to become a passenger train for disease bacilli which have limitless transfer privileges.

Don't work too much. Don't rest too much.

If great care is taken there is no danger of infection even if you live with a consumptive. The patient must use a cup or paper that can be scalded out or burned. Clothing and bedding used by the patient must be boiled regularly. The patient's room must be kept free from carpets and hangings that would offer hiding places for germs. There should be separate dishes for the patient. There must be a generous use of antiseptics. The house must have plenty of fresh air and sunshine.

How to Keep Gold Embroidery Bright.

Gold embroidery is apt to cause many misgivings when a satin evening gown decorated in this manner is brought under review. However carefully the dress has been protected by soft tissue paper—opaque, black paper which is sold for the purpose—the smallest hole where air could enter will have had the effect of tarnishing the embroidery. To clean the gown is, however, fairly simple, ordinary stains being easily removed by rubbing the satin all over with stale bread-crumbs which have been sifted with a little powdered blue. To remove crumbs and powder a thorough shaking will be necessary, together with flicking with a clean handkerchief, the rubbing being repeated where necessary. For the gold embroidery there is nothing so useful as crimson velvet. A small piece should always be kept at hand, and both before the commencement of the season and also on taking off the gown each time it is worn the velvet should be rubbed briskly over the surface until the original sheen is reproduced.

How to Cure Hiccoughs.

There is a young woman who suffers great discomfort, sometimes sharp pain, from an occasional attack of the hiccoughs. She tried all the prescribed remedies, from deep breathing to plums fresh and preserved, without success. Nothing availed, the pain often lasting an hour or more, until she tried aromatic spirits of ammonia, a teaspoonful diluted in a little water. The relief was instantaneous. All subsequent attacks have been cured by the same means. The trouble in acute form is somewhat out of the ordinary, but the annoyance it entails makes it worth while to pass this hint along.

How to Treat Linoleum.

The way to prolong linoleum's period of usefulness is to keep it clean. Dirt ground into the finished surface by the tread of feet is the floor covering's greatest enemy. Linoleum needs no soap, ammonia or strong cleaning agents. A simple wiping with a cloth just moist with warm water is all that is needed. Once or twice a year give the linoleum a wiping of good furniture polish to renew its smooth surface.

How to Know Cooking Measures.

Young housekeepers are often at a loss when a recipe calls for a cup of anything to tell what kind of cup to use or how much a cup measures. The accepted measure is a stone kitchen cup and means that cup filled to the brim. It is equal to one-half pint. A cup of solid butter, milk, chopped meat or granulated sugar is equal to about half a pound. A cup of sifted flour is equal to one-quarter of a pound.

How to Brighten Your Piano.

Take a basin of lukewarm water, wet a piece of soft cheesecloth in it; then pour a few drops of kerosene oil on the cloth and rub lightly over your piano. Keep repeating until you have been all over the surface; then take a dry piece of cheesecloth and polish until it is glossy. Your piano will look like new and that dull, smoky look will all disappear.

How to Clean Asbestos Mats.

"I had a set of asbestos mats given to me," said a housekeeper, "which kept my table from scarring and were a joy to me until they got so soiled I thought they must be thrown away. A friend told me to put them on top of the hot coals in the range to clean them. I did. The dirt was burned off, and they were as clean as when new."

Amador County
Descriptive Article

Amador county comprises an area of 548 square miles. It lies on the western slope of Sierra Nevada mountains, and embraces within its territory all the diversity of valley, foothill, and high mountainous lands.

Climate.—The climate of the populous portions of the county is as genial and healthful as can be found anywhere in California. As climate is one of the most valuable assets of this favored state in attracting population, Amador stands second to no county in this regard. It should, and no doubt will in time, when its climatic advantages are more thoroughly understood and appreciated, become a health resort not only for those in less favored states, but for the residents of other parts of California. The temperature alone the central portion rarely falls below 30 degrees above zero in winter, and as rarely rises to 100 degrees in the summer. Snow seldom falls in the settled districts, and never remains on the ground for more than a few hours. Of course, in the high mountain regions of eastern Amador the snowfall is very heavy—which is characteristic of the entire Sierra Nevada range. The summer season is always accompanied with cool nights; permitting of sound, refreshing slumber. Fogs are rare, cyclones are unknown, thunderstorms are infrequent.

Gold Mining.—The county, although rich in other sources of wealth, comparatively untouched, is noted principally for her quartz mines. The deepest gold mines in America are located here. The Kennedy mine is now taking gold in liberal quantities from quartz extracted from a depth of over 3000 feet below the surface, with every indication that the pay-ore extends to a much greater depth. Since the discovery of gold, the county has contributed fully \$100,000,000 to the world's supply of the precious metal. The mines are still yielding at the rate of about two million dollars annually. Nearly all of this wealth is produced by eight or ten mines operating on what is called the "mother lode," stretching clear across the county in a north-easterly direction a distance of twenty miles. The mines aggregate between 400 and 500 stamps, and furnish employment for over 1000 miners. This industry is still in its infancy. The unexplored territory, even along the main gold belt, is far in excess of the ground that has actually been worked or prospected. The county offers today one of the most inviting fields to be found anywhere in the world for the investment of capital in the fascinating business of gold mining, not alone along the mother lode, but also in the almost untouched mineralized country of the east belt, some ten or twelve miles from the main lode.

Besides gold, we have copper, deposits of pottery, coal, marble, slate, limestone, granite, and soapstone or talc—all undeveloped.

Agricultural Capabilities.—The agricultural possibilities equal, if not excel, the mineral riches. The valley lands will produce anything that can be grown in the most favored sections. In the foothill lands all kinds of deciduous fruits thrive; also all kinds of vegetable are raised where irrigation is practicable along the numerous water courses. Further up in the mountains, at an altitude of 2000 to 2500 feet, the soil is admirably adapted for apples and potatoes. A ready market for many times the quantity now raised of these commodities can be found in the various mining towns.

Grape culture and winemaking are becoming important industries, both the grapes and wine commanding a better price than the product of the lowland.

Land is cheap compared with other California lands. Improved farms may be secured for one-fourth the price current in some places. Unimproved lands can be had from \$5 to \$10 per acre. It does not require a fortune to buy a small ranch. There is room for a large addition to our agricultural population. Vast tracts now devoted to cattle ranges might be made the homes of hundreds of prosperous farmers.

Amador has a population of less than 12000. Three fourths of this is concentrated in a strip of three miles above and below the mineral belt.

Jackson, the county seat, has about 2500 inhabitants, and is an incorporated city of the sixth class. Other towns are Sutter Creek, Amador City, Drytown, Plymouth, Volcano, Pine Grove and Oleta. Ione City is the metropolis of the valley section, a thriving town of 1000 inhabitants.

The community is law abiding. Educational facilities are excellent. A schoolhouse is within easy reach of nearly every family. There is one high school, located at Ione.

The assessment roll for 1909 is \$5,800,793, and the tax rate for both state and county purposes \$2 on the \$100.

The Southern Pacific has a branch railroad running to Ione. From this point the Ione and Eastern railroad extends 14 miles further to the mining section.

The various religious denominations and fraternal organizations are well represented.

The power plant of the Standard Electric Co—one of the largest in the world—is located four miles from Jackson.

Oldest Love Letter In The World.

A love letter 4000 years old has lately been discovered in Chaldea. The lady to whom it was addressed lived in Sippara, the biblical Sepharvani. Her beloved was a resident of Babylon.

In contrast to the position which women hold at the present day in the Orient they possessed in antiquity a great degree of freedom. In many respects the Oriental woman of antiquity was graced with as much privilege as is the modern European woman. Particularly in Chaldea, she could participate in trade, manipulate her own property, be a witness before court and be the guardian of her own children. Of the position of women in Egypt we know less, but doubtless it was much higher than that of the present Mohammedan women. In one respect, however, it seems that custom has been changed very slightly, for marriage was essentially an affair of trade between the parents of the bridegroom and those of the bride. This is ascertained from the legal code of Hammurabi, king of Babylon, B. C. 2200. The future husband paid the price of the bride and her father provided her dowry and trousseau. Under these circumstances there was no such courtship as precedes marriage in accordance with Occidental ideas. Still, one may believe that many a love letter on papyrus or clay passed secretly between the hands of the bridal pair during the interval of their engagement.

The newly discovered letter is written in clay and probably dates from 2200 B. C. Through somewhat formal, the reader can feel the tenderness that lies hidden between its lines. It read:

"To the lady, Kasbaya (little ewe), says Gimil Marduk (the favorite of Morodach) this: May the sun god of Marduk afford you eternal life. I write wishing that I may know how your health is. Oh, send me a message about it. I live in Babylon and have not seen you, and for this reason I am very anxious. Send me a message that will tell me when you will come to me so that I may be happy. Come in Marchesvan. May you live long for my sake?"—From Current Literature.

"Generally debilitated for years. Had sick headaches, lacked ambition, was worn out and all run down. Burdock Blood Blisters made me a well woman."—Mrs Chas. Freitov, Moosup, Conn.

TREATMENT OF FALSE HAIR.

How to Clean it Properly and Make it Last and Look Better.

False hair will last longer and look better if properly cared for, and as the best quality is not inexpensive and should be selected it behooves a woman, now that quantities of it are worn, to know how to make it last.

To begin with, then, a cheap quality is the most expensive, for after little wear it becomes either scrubby looking or so harsh that it cannot be used. Cheap pieces lose color and either streak or fade quickly.

One of the most important and difficult details of caring for chignons is to keep them free from dust. Like hair growing on the head, they hold impurities and unless cleansed will grow dull looking and old. In their care a soft brush is an essential, and every night when the pieces are removed they should be stroked lightly, but thoroughly, with bristles in such a way that the dust is taken out. This should not be omitted even for one night, for once the switch or puffs become dust laden they are difficult to clean.

No false hair, when not being worn, should be exposed to the light, for sun and air will absorb its dressing unnecessarily. After being worn it must never be put away until it has been well smoothed.

To wash a switch or puffs is practically impossible, but as cleansing is necessary at intervals cornmeal should be applied. The meal must be rubbed gently, but thoroughly, through the strands, and then, fastening the top of the piece securely, a long bristle brush must be applied vigorously to remove the grains. Before this, however, the long hair must be rubbed between the hands, so the meal will absorb the dust.

Once in a long while, perhaps every two months, a little oil rubbed on the false piece will keep it in condition and aid in preserving the dressing. For this glycerin is excellent, and the manner of applying should be carefully followed. Too much of the grease will almost ruin it, while too little will not be effective. When using the glycerin the tip of the piece must be securely fastened where the long hair will hang free. Then a few drops, scented, may be rubbed between the palms of the hands to distribute it evenly and then put directly upon the hair, the only difficulty being that unless care is exercised the grease will adhere to only one part of the switch. This is most apt to be avoided by pressing the palms lightly when first they are put on, making the stroke heavier as the grease is absorbed. Under no circumstances must there be an appearance of grease.

How to Cook Bananas.

Few persons know the convenience and delicate taste of cooked bananas. Few not to bananas born realize their nutritive value. Yellow bananas can be employed in many excellent ways. They are fine plainly boiled in their skins and served with cream or sweet butter for breakfast. They may be boiled with salt pork or baked around a leg of fresh pork (peeled in last instance) or fried and served with broiled lamb kidneys and bacon. Used in this way, both the kidneys and the bananas take on an added flavor by being together. Select fruit which, while ripe, is yet perfectly firm. Ten minutes are required for boiling and five or a little more for frying. The fruit will let you know when it is done, for it falls into a pulp as easy to digest as baby food. Baked bananas may take the place of potatoes on a luncheon table, as they are excellent with all meats. Bake them in their skins in a hot oven and punch them occasionally with the fingers to see how they are progressing.

How to Make Cleaning Balls.

Cleaning balls are easily made and cost less than if bought of a chemist. To make them take half a pound of dry fuller's earth and moisten it with a little lemon juice. Then add half an ounce of finely pulverized pearl ash, and make all into a thick paste. Form into little balls, and dry them in the sun or at some distance from a fire. In a few hours the balls will be ready for use. When required the stained cloth should be moistened with warm water and rubbed with a ball. Let the garment dry, then brush off the powder, and wash it out if necessary.

How to Wash Delicate Materials.

To wash silks and ponzes and dainties so that they will look like new wash them in bran water. For one waist take a pint of bran, put in a white muslin bag and pour enough hot water into the basin containing the bran to wash the waist. When the water is cool enough to bear the hands in squeeze the bag several times in the water. Add a teaspoonful of borax and wash the waist in the prepared water, rinse and when dry iron on the wrong side. No starch is needed, for the bran will stiffen the waist sufficiently.

How to Remove an Ink Stain.

A little pure alcohol of any kind is splendid for removing stains caused by a typewriter ribbon. Rub it well into the fingers as soon as possible after they are stained. Afterward wash carefully in warm water and plenty of really good soap. If you have no pure alcohol try methylated spirit.

How to Keep Shirt Waists Trim.

If you have difficulty in holding your shirt waists down make a belt of strong elastic two inches smaller than your waist. Then sew a hook on one end and an eye on the other and fasten around the waist over the shirt waist and under the skirt band. It works like a charm.

CARE OF THE EYES.

How to Prevent a Strain and Relieve Inflammation by Simple Methods.

Persons who use their eyes constantly should observe some simple rules for preventing strain. For instance, at the end of a long day in an office, if the optics are bathed with a cooling application, the brightness as well as sight may be maintained. For such a bath boracic acid is invaluable. So is a weak solution of salt. Camphor water will draw out a smarting pain many times.

Five cents' worth of boracic acid will last for weeks, and the powder may be carried with little trouble. To use as much as might go on the point of the blade of a small penknife is put into two tablespoonfuls of water. The powder floats for some time in tiny lumps, but later is absorbed and disappears.

If one has an eyeglass the liquefied borax is poured into it. This glass, which is an oval cup, so shaped that it goes over the eye, close against the skin, is held up, the head bent until the eye is over the liquid, and then the lid is opened and closed in the bath. There will be no smarting sensation, and the under part of the lids and the ball are flushed with a cooling application that will draw out any slight inflammation.

The bath may last for a minute, washing first one eye and then the other eye before returning to give the first another plunge. The same liquid may be used more than once, but so cheap is it that there can be no hesitation in throwing it away. No two persons should ever use the same solution, for serious eye disease may be transmitted in this way. If the eyes ache during the day this treatment, which takes but a moment to apply, will relieve them.

Camphor water, being a little stronger, is used more sparingly and is likely to cause a slight smarting. Nevertheless it is a gentle tonic that can do no harm. To use a couple of drops are put into the eyes by means of a medicine dropper. This may be done two or three times a day when there is such inflammation. Boracic acid dissolved in it in the same proportion as in plain water increases the beneficial properties.

Salt and water is an old fashioned remedy which should be used frequently. This mixture should be strong enough to cause the merest suggestion of a smart, but it must not be painful. If one has no eye cup any small cup or glass may be substituted and the eye winked in the bath. Done morning and night, this is strengthening in effect.

Cloths wrung out in hot water and laid over the eyes form one of the best methods of treatment for inflamed eyes. To take this application one must lie down, so the fomentations may be placed on as hot as can be borne, changing them frequently.

How to Wash Crocheted Articles.

Crocheted and knitted articles can be washed satisfactorily by sewing the articles in a pillow slip and then washing them in warm soapy water. The bag must be squeezed between the hands to make it clean, but it must not be rubbed between the hands. When you think the articles must be clean press all the water that you can out of the bag, but do not wring it. Then hang the bag in the air to drain and when it is perfectly dry rip open the pillowcase, and the article will be found in excellent condition. If the wool article is a baby's carriage blanket or a straight shawl it will be improved by drying it on a flat surface. It may be spread on the table or on the floor if clean papers or a clean cloth is spread on the floor first. The article should be patted until it is perfectly straight and flat and should then be left until it is perfectly dry.

How to Purify Rainwater.

Rainwater is one of the best washes for the complexion in existence, but clean rainwater is often hard to get, for after every shower the water from the barrels is black with soot, etc., washed off the roof. To prevent this and to secure clean rainwater, get a bit of coarse, close canvas and make a little bag of it. Into this bag put some clean gravel, and tie the bag on to the end of the pipe, so that the water will have to pass through the gravel before reaching the barrel. The gravel makes a capital filter, and if it be changed from time to time and the barrel be kept clean you will always have clean soft water when required for any purpose.

How to Lengthen Life of a Pillowcase.

Every housewife knows how soon pillowcases wear out, but it took a remarkably clever woman to see at a glance how she could prolong their lives. When her pillowcases are beginning to show signs of wear she takes out the seam at the bottom of the case and turns it round, so that the side seams come directly up in the middle. Then she reseams the bottom. It is easy to see that this will bring the side of the pillow under the head, where the wear would come, so the pillowcase will last longer. A better idea could not be found, and who minds sewing up a pillowcase seam?

How to Wash Silk Gloves.

Silk gloves should be washed in warm water and with pure white soap and should then be rinsed in several clear waters of the same temperature. Then, instead of hanging them up to dry by the wrists, hang them up by the tips of the fingers. To do this pin each finger out on a cloth and hang up the cloth with the arms of the gloves hanging down. This lets the water run into the parts of the gloves that receive the least wear and lets the tips, which receive the most wear, dry the quickest.

FROM OUR
CORRESPONDENTS

AMADOR.

Oct. 7.—Mrs Fred Williams returned from Sacramento Friday.
Miss Lucia Kerr left Saturday for San Francisco, where she will remain for the Portola festival.

Mrs Dr. Delucci and Mrs. D. Ramazota of Sutter Creek, and Miss Tam of Plymouth were visiting Mrs. J. Phipps, jr. Thursday.

Mrs Chas Morrow and baby of Jackson visited her husband, Chas. Morrow, who is employed at the California Consolidated Co., for a few days last week.

Mr and Mrs Dunlap returned from Stockton Sunday.

Frank Largomarsino returned from his vacation at the Seattle exposition Sunday, and we are glad to see his smiling face again.

Mrs W. Payton, who lived here some time ago, returned from Nevada where she has been for the past year or so. She will live here for the present.

Mrs Con O'Neil returned from Railroad Flat Monday.

George Nichols of this vicinity left Sunday morning for San Francisco.

Fred O'Neil was a passenger on the outgoing stage Saturday for San Jose, where he will visit with relatives.

Elsie Tenaman, who has been visiting the Vennings, left for Stockton Saturday.

Miss Mary Chichizola visited friends in Plymouth Friday and Saturday.

Pingia Rettagliata is still on the sick list.

Mrs Kirkland of the Hawaiian Islands, formerly an old resident of Amador, was visiting with friends of this vicinity Wednesday.

Julius Chichizola left Wednesday for Jackson on business matters.

Mrs Mary Kemp and little granddaughter, Lida Phipps, were visiting Sutter Creek Monday.

Mrs McKimmy is on the sick list.

The late rain was very welcomed to the majority of the people, and it settled the dust.

Mrs Fenton, who has been visiting in Los Angeles, came back Tuesday night.

Mrs MacDonald of San Francisco is here on account of her sister, Pingia Rettagliata's illness.

The Rev. Irving B. Bristol preached in the M. E. church last Sunday evening.

PLYMOUTH.

Oct. 6.—Mr and Mrs P. Neville who have been visiting relatives here returned last Wednesday to their home in Point Richmond.

B. Levaggi, who has been in San Francisco for some time returned last Friday.

Mr Holman, an old resident of this place died Thursday Sept. 30th, and was buried on Saturday, Oct. 2nd.

H. E. Potter has had his fence fixed up, and a new cement walk from the front gate around the side of the house to the well. Mr Fortner, and son Will of Jackson did the cement work.

John Dohmas, who has been employed at the Copper mine near Loma, returned to his home here. Mrs Dorman is expected home soon.

Mrs Parker of Jackson is here on a visit to her daughter, Mrs H. E. Potter, who has been on the sick list for some time. Wild Roses.

SUTTER CREEK

Oct. 7.—Mrs D. A. Fraser has returned to her home here, after an extended visit with her daughters in Redding, Cal.

Miss Kate Walkmeister, left last week to visit relatives in Stockton and San Francisco for a month, and will witness the sights of the Portola.

Mrs Mary Prosser has returned to her home in Oakland, after several months visit here with her sister, Mrs E. Jones and family.

Miss Mary Lynch left Tuesday morning to visit a short time with friends in Oakland and San Francisco.

Mrs J. Daneri, and grandmother, Mrs J. Truran, returned Saturday evening from San Francisco, after a visit of three weeks with relatives at that place.

Miss Lena Soracco went to San Francisco Tuesday, to visit relatives and witness the Portola festival.

John Doney and wife and little son of San Francisco, are here visiting Mrs Doney's parents, Mr and Mrs Thos. Trudgeon.

Miss Julia Tanner departed Tuesday morning to visit with her sisters in Berkeley and San Francisco, and will also enjoy the Portola festivities.

John Stribley departed Monday morning for Woodland, where he will attend the Grand Encampment, I. O. O. F. as a delegate from Amador Encampment, No. 17.

HAMMER.—In Ione, September 27, 1909, to the wife of Ben Hammer, a daughter.

THE FINICKY CHILD.

How a Clever Mother Can Tempt a Fittful Appetite.

The guardians of a finicky child know that mealtime is often more than a matter of table setting and food buying. Theorists say, "Make a child eat!" But mothers know that this is often impossible until the little one is reduced to sickness.

It will be found easier to tempt the fittful appetite rather than to scold or punish. Delicate children can often be coaxed into a hearty meal when force work would mean a scene. Make the meal a playtime. Serve bread and butter cut into thin slices and piled up in a bowl like a mountain, and pretend the child is an ogre to eat it up.

Name dishes for different rhymes, as Jack Horner's pie for hollowed out rolls cooked like croutons and filled with the nourishing poached eggs. Potatoes can be molded into the form of a wall with an egg perched on top to represent Humpty Dumpty. The child will quickly eat up the egg to prevent "the great fall."

Boiled rice can be molded into snowballs, floating island can have all sorts of delightful fancies woven about it, vegetables can be cut into odd shapes, and nourishing custards, if put in individual molds of animals, will be eaten without a protest.

Beef juice usually causes a struggle, but if the child pretends he is Jack the Giant Killer, hurrying to get rid of the delicious juice lest the giant think it "the blood of an Englishman," it is swallowed without a murmur.

The game becomes of interest to mother as well as child, as the necessity to invent new stories and fresh forms to tempt the little one to eat demands ingenuity. Insensibly the child learns to eat, so that later the practice can be discontinued.

A trouble? Yes, but not half so troublesome as to sit up half the night with a child cross from lack of food or as to see dear ones dwindling from insufficient nourishment that a little effort could supply.

How to Handle Fine Carriages.

The following instructions are given by an experienced carriage builder in reference to the care of fine carriages: Freshly varnished carriages should be washed frequently and exposed to the air in the shade and should not be covered until the varnish has become hard. Mud allowed to dry upon fresh varnish will leave spots, and exposure to ammonia will destroy fresh varnish. Plenty of water should be used and great care taken that it is not driven into the body of the carriage, to the injury of the lining. For the body panels a large, soft sponge must be used and when saturated squeezed over the panels, and thus by the flowing down of the water the dirt will be softened and run off harmlessly. Care should be taken to wipe the surface dry with soft chamois leather. Never use the same sponge and chamois for panels which are used for running gear. Never use soap on varnished surfaces, and only take off the grease and dirt around the hubs and axles.

How to Save Gas on Ironing Days.

When using a gas stove to heat the irons for ironing much gas can be saved by buying a tin pan large enough to fit over the number of flat-irons used. A dishpan is excellent for this purpose. Make a hole in the bottom of the pan and fasten a holder here. Small wooden knobs can be bought for 5 cents at any hardware store. The knob should be fastened on the outside of the pan. Use this pan to cover the irons with, and they will keep the right heat with the gas turned much lower. You will be surprised at the amount of gas this will save and how hot the irons will be to work with. It is not difficult to remove the pan when the irons need changing, as the wooden handle will not become hot.

How to Relieve Headache.

There are many kinds and causes of headache, but probably the two most common headaches result from nervousness or a disordered stomach. In cases where there seems to be too much blood in the head, when there is a pounding in the temples and behind the ears, a warm drink will often afford relief. Drink a cup of tea or water to which the juice of a lemon has been added, as hot as it can be borne, and place the feet in hot water. This will draw the blood from the head and will relieve the pain greatly. Some chronic sufferers from headache claim that there is no cure like a brisk walk in the fresh air with as loose clothing as possible, followed by a nap in a darkened room where the fresh air abounds.

How to Preserve a Brass Bedstead.

A good brass bed should only be dusted with a soft clean cheesecloth and must never have brass polish used on it. So treated it should keep its luster for years. When it has grown dull and dark about the only remedy is relacquering, which costs from \$5 upward, according to the size of the bed. Be careful not to let coal gas get a chance at your brass furniture and do not keep the windows up over the bed on a very damp or rainy day. When the brass seems to be moist it should at once be wiped off with the cheesecloth or silk duster.

Rush of '49.

The rush of '49 is moving with a rush. The committees have outlined a complete program of historical spectacles to recall the golden days of California's early history, and the visitor who does not carry away with him a tender recollection of the days of old, the days of gold, and the days of '49, stimulated by the reproduction of familiar scenes of that period, will fail to get all that is coming to him.

Breathes there a man with soul so dead, who does not thrill at the stories of the honored pioneers who braved the wilds of the western plains and the perils of the sea to reach this land of sunshine and gold in quest of fortune and a home. There will be a museum of curios filled with mementoes of the rigor of prairie schooner, and the crude sailing vessel.

The cradles that rocked some of the foremost men of the state in this generation, vokes that brought the oxen through the trackless west, cooking utensils, and personal treasures—all to be exhibited free.

A daily newspaper printed with old style presses and with quaint type, will chronicle the news of fresh pay streaks, lynching bees, and Indian raids, and will put the early efforts of Mark Twain and Bret Hart on the Comstock to shame.

The mining camp will show how the treasure filled Sierras were made to yield up their gold, from the primitive rocker and pan to the machinery of this era. The Plaza will be filled with clean wholesome shows. The directors of the celebration will take a step in advance of modern carnivals and protect the public from the fake or vulgar exhibitions. Most of the shows will be free. The historical spectacle of '49, and the carnival spirit of '09 will be combined into a week of education and fun in Stockton, the gateway to the miners, during the week of October 26 to 30. Don't forget the date.

Better Not Get
Dyspepsia

If you can help it. Kodol prevents Dyspepsia, by effectually helping Nature to Relieve Indigestion. But don't trifle with Indigestion.

A great many people who have trifled with indigestion, have been sorry for it—when nervous or chronic dyspepsia resulted, and they have not been able to cure it. Use Kodol and prevent having Dyspepsia.

Everyone is subject to indigestion. Stomach derangement follows stomach abuse, just as naturally and just as surely as a sound and healthy stomach results upon the taking of Kodol.

When you experience sourness of stomach, belching of gas and nauseating fluid, bloated sensation, gnawing pain in the pit of the stomach, heart burn (so-called), diarrhoea, headaches, dullness or chronic tired feeling—you need Kodol. And then the quicker you take Kodol—the better. Eat what you want, let Kodol digest it.

Ordinary pepsin "dyspepsia tablets," physics, etc., are not likely to be of much benefit to you, in digestive ailments. Pepsin is only a partial digester—and physics are not digesters at all.

Kodol is a perfect digester. If you could see Kodol digesting every particle of food, of all kinds, in the glass test-tubes in our laboratories, you would know this just as well as we do.

Nature and Kodol will always cure a sick stomach—but in order to be cured, the stomach must rest. That is what Kodol does—rests the stomach, while the stomach gets well. Just as simple as A, B, C.

Our Guarantee

Go to your druggist today and get a dollar bottle. Then after you have used the entire contents of the bottle if you can honestly say, that it has not done you any good, return the bottle to the druggist and he will refund your money without question or delay. We will then pay the druggist for the bottle. Don't hesitate, all druggists know that our guarantee is good. This offer applies to the large bottle only and to but one in a family. The large bottle contains 2½ times as much as the fifty cent bottle.

Kodol is prepared at the laboratories of E. C. DeWitt & Co., Chicago.

CONTEST NOTICE

In The United States Land office at Sacramento State of California.
Robert O. McKean, Plaintiff; vs. Geshon G. Russell, Defendant.

Involving H. E. No. 6649, Serial 10137. There was filed in this office on August 20, 1909, a corroborated contest affidavit against homestead entry No. 6649, made May 13, 1897, for the NW¼ of SW¼ of Sec. 4, SE¼ of NE¼ and E½ of SE¼ of Sec. 5, T. 7 N., R. 13 E., M. D. M., by Geshon G. Russell, the said contest affidavit being executed by Robert O. McKean, and alleging that the land involved has been wholly abandoned by said Russell for ten years past and that no attempt whatever has been made to cultivate and improve said land by said claimant.

Therefore, said parties are hereby notified to appear and offer evidence touching said allegations at ten o'clock A. M., on Monday, October 25, 1909, at ten o'clock A. M., before the Register and Receiver of the U. S. Land Office Sacramento, California. The contestant, in a proper affidavit filed August 20, 1909, having set forth facts which show that after due diligence, personal service of the notice of contest cannot be made, it is hereby ordered and directed that such notice be given by due and proper publication.

Dated, Sacramento, California, September 2, 1909.

THE MODERN BANK

Without the modern bank there would be no safe deposit boxes for money, no strong vaults and automatic locks, no way to disburse money in payment of accounts except by cash, no chance to mail drafts or checks, no circulating medium, and the efficiency of money would be reduced ninety per cent. Shut out banks and industries would languish and commerce cease. And all this would result if everyone was afraid to trust the banks. Even the miser is the beneficiary of the prosperity created by modern business methods. Are you among the misers or among the business promoters?

Bank of Amador County

LOCAL NEWS

J. F. Wilson, Dentist. Hours 9 a. m. to 5 p. m. Phone—Office, black 444; residence, black 394; Jackson.

Mrs G. W. Brown returned this week from a visit to San Francisco, accompanied by Mrs Joshua Taylor, from Marion county, Missouri, who will remain for several weeks.

Dr. Endicott is expected to return home between the 15th and 20th of this month. At last accounts he was in Minnesota, after visiting his old home in Missouri.

Mrs Dr. Gall returned home Sunday, after an absence of about six weeks, during which she visited the Alaska-Yukon exposition with Dr. Gall, and thereafter visited relatives in San Francisco.

Mrs Ben Fuller returned home Sunday, after a stay of several months with relatives in Washington state.

Mrs Fontenrose returned Sunday from San Francisco, where she was called to see her sister Loretta Meehan, who has been under treatment at one of the hospitals for the past two months.

G. M. Blair and daughter, Mrs DePue left Sunday morning for San Francisco for a vacation.

We are pleased to inform our readers, that Attorney Chas. H. Crocker, formerly of this place, has resumed the practice of his profession at the office of Attorney Chas. M. Beckwith, 918 6th St., Sacramento, Cal. Oct 1-1m.

C. D. Peek and wife left for San Francisco Monday last, for a visit of several weeks, and to see the sights during the Portola festival. Mr Peek has secured a vacation for one month as driver of the Plymouth stage. Mr Steiner, the stage owner, is driving in his place until he returns.

Saturday a big monthly shipment of bullion was made by express, the product of the mines of this vicinity. Gold bars were sent from the three mines Kennedy, Argonaut and Zeila.

Two feet of snow fell in the vicinity of Silver lake during Saturday. The cattle men, with the advent of nature's mantle of white, prepared to get out of mountains at once. They have been driving their herds to the lower ranges ever since. No doubt more snow has fallen in the high sierras, since Saturday.

Mrs John Mitchell, who has been sick for some time, was taken to Oakland last Saturday, in the hope that the change of climate will restore her health. She has a married daughter, Mrs Wrigglesworth, in that city, with whom she will stay during her visit. Her husband, John Mitchell, accompanied her to the city.

Miss May Love, who was committed to Napa about eighteen months back, has been discharged cured. She has returned to her folks at Martells, and says she never felt better in her life. She was in town Wednesday, and her many friends were gratified to notice her decided improvement in her health.

Mrs Barrett of Lincoln, Placer county, is visiting her brother, C. M. Meek of this city.

Miss Alice Mello, of Sacramento, is visiting relatives in this city.

Fifteen head of beef cattle for sale age one to seven year old not fat. Ranch between Placerville, Somerset and El Dorado Co. Address Box 235 Placerville. Charles Brochu, Hanks Exchange, Calif. Oct. 1-1m

George Murphy and wife went to Stockton Monday, and will visit San Francisco during the Portola festival before they return.

Jos. Dalo is building a neat and convenient dwelling house in South Jackson. When completed it will be quite an ornament to that part of the city.

Peter Ferrari and family, from near Butte mountain, intend moving to South Jackson, shortly. He has rented his ranch to his son Nick Ferrari.

Mrs Stark, who has been visiting in San Francisco for several weeks, returned home last week.

A case of scarletina developed in the family of R. Fortner on Tuesday. The patient is a boy of six years. A quarantine was at once established.

Father Azaveda, the Catholic priest of Sutter Creek, will go to Sacramento next Monday, to establish a new mission among the Portuguese element in that city. After establishing the mission he will return to his charge in Sutter Creek.

An effort is being made to resurrect the Episcopal church, with a resident rector. W. M. Penry Jr. and Harvey Mason have been informed by Bishop Moreland that the church will be re-established on a guarantee of \$75 per month for the rector's salary from the two towns of Jackson and Sutter Creek, and the town that furnishes the largest contribution to this amount will be accorded the honor of having the resident rector. This is expected to start a rivalry between the two places to secure the new pastor. Whether the required amount can be raised is a doubtful problem at present.

Louis Oneto has disposed of his interest in the Oneto vegetable garden on the middle fork of Jackson creek to his brother Joseph. He moved into town from the ranch this week, occupying a portion of the dwelling next to the National hotel, recently vacated by Geo. C. Morrow and family.

Miss Tessie Toons, one of the local hello girls, went to Oakland this week for a two weeks' vacation.

G. Badaracca is on the sick list, and under the doctor's care. His condition is deemed critical.

Judge John F. Davis came up from the city Tuesday on legal business. He was seized with cramps Wednesday and confined to his bed during Thursday.

J. Barton went to Sacramento Monday to be present at the arrival of President Taft in that city.

The nine year old daughter of Thos. Kelly, near Newmanville, is suffering from scarlet fever. The place is quarantined.

Hugo Gobish, a former resident here, came up from San Francisco this week, and is staying with Henry Weil, on a visit.

Harold Waddell of Fresno county, is visiting at Dr. Endicott's.

R. Banti and G. Baldocchi were arrested a few days ago on a charge of cruelty to animals, preferred by the proprietors of one of the livery stables. The offense consisted in over driving the team. The first named was fined \$20 by judge Goldner and the latter \$15. Both paid the amount.

By paying all arrears and \$3 in advance, subscribers can get Ledger and daily San Francisco Bulletin for one year.

Unclaimed Letters.

G. Divecchio, Joe Gallo, Italiano Gaziolda, Giovetti Giuseppe, F. Gliglione, W. Heanll, R. Sandin, Mrs Mike Katusich, G. Monfredini, M. Panero, Mrs Ada L. Tregloan.

Children Cry FOR FLETCHER'S CASTORIA

Owner of Lost Snake Heard From

Monday the owner of the big snake found in the loft of the Ginocchio warehouse last Friday, no doubt being informed through the press dispatch to the city papers of its discovery, sent a message to the effect that he would pay a reward of \$5 to its captor, on condition that it be boxed up and sent to him by express at his expense. Mark Tibbits, who claims the reptile by virtue of its capture, declined this generous offer. Big snakes do not stand very high in the market at this rate. The reptile is called a rock python, and is said to be a native of India. It escaped from the menagerie that was around here about two months ago. The snake was sick at that time, and was placed in a box out in the sun to liven it up. It crawled out of the box, and got into the warehouse, and is supposed to have lived on rats during its imprisonment there. The owners of the outfit knew of its escape before they left here, one of them having noticed the night before leaving looking around with a lantern in quest of something. Not a word was dropped as to the escape of the snake, on the ground probably that it would tend to create alarm. Tibbits, who has charge of it, was disposed to exhibit it, but this was not tolerated by the officials. It was kept in the show window of Tam's store for some days. Tibbits, unless other inducements offer, expects to take it to the city next in the hope of getting a bigger price for it.

To Be Paroled

Domenico Bacigalupi was expected to reach Jackson last night from San Quentin on parole. He was convicted May 16, 1899, of murder in the first degree for taking the life of his wife by administering strychnine poison, the jury fixing the punishment at life imprisonment. The crime was committed near Buena Vista. It was one of the most deliberate and cold-blooded murders ever committed in this county. The defendant, however, was considered weak-minded, and hardly responsible for his action. It is probably on this score that his liberation on parole was sought.

Arrested for Criminal Assault

Dow. Nichols was arrested at his home in Jackson Valley on the 5th instant on a charge of felonious assault. The complaint was made by William Hamm, the father of the girl, who is a minor, about fourteen years old. The arrest was made by deputy sheriff J. E. Kelly of Lone. The assault is said to have been committed September 25 last. The defendant is a well-known resident of the valley section, about 50 years of age. He was before justice Garlin at Lone, who fixed bail bonds at \$2000, which he had no trouble in securing, and was released pending further proceedings.

Health and Mortality Report.

Acting county health officer, Dr. A. M. Gall, reported to the supervisors at their last meeting that there were no cases of contagious diseases in the county during the month of September.

Denied Citizenship.

Last Monday Judge Wood denied the application of Giovanni Battista Avanzino to become a citizen, on the ground of deficiency in knowledge and understanding of the government as required by an order made September 18.

Salvador Previtali's, application was also denied on account of lack of five years continuous residence preceding the date of filing his petition; Also Giuseppe Romite for the same reason as stated in the first case.

Chapter of Accidents.

An Italian miner named S. Paradotti was severely hurt by an accident in the Kennedy mine this week. He stepped into a hole in the ore chute at one of the levels, and fell 36 feet to the bottom, striking on his head, fracturing the skull. He was removed to the boarding house at the mine, and attended by Dr. Gall. He was still unconscious at last reports.

On Saturday Sam Davalle received a bad cut in the forehead while working in the Argonaut mine.

Two weeks ago, Whitney, son of E. S. Pitois, while playing about the Pitois residence, fell on a sharp picket inflicting a flesh wound in the left thigh which required several stitches to close.

DOCUMENTS RECORDED.

The following instruments have been filed for record in the recorder's office since our last report. We publish a complete list of documents recorded, and must decline to accede to any request to suppress any document from these columns. Don't ask us to do so

Declaration of Homestead—T. J. Burrow, files a declaration of homestead on part of lot 4 and lot 5 block 2, Jackson, and that said property is estimated to be worth \$2500.

Attachment—C. H. McKenney files a writ of attachment issued out of justice court of No. 4 township against M. F. Shearor on an undivided one-half interest in lot 13 block 10, Sutter Creek; demand, \$300.

Certificate of Redemption—Mrs Susan Gorton on 77 acres in 31-7-11, taxes of 1896, \$64 12.

Argeements—John F Davis argees to extend the time to John J Cranmer to purchase the Dane & Mitchell mines at Pine Grove, provided the latter makes a payment of \$2500 on December 1, 1909 and the balance of \$2500 to be paid one year later.

John J Cranmer agrees to sell to O'Donnell et al the Dane and Mitchell quartz mines near Pine Grove. The option heretofore given by John F Davis enters into the agreement. Cranmer is to receive \$1500 and \$35,000 worth of the capital stock of a corporation to be hereafter formed under California laws with a capitalization of \$250,000.

F Allene Orr agrees with Julius Fregulia et al that he will pay each \$500 on the completion of a shaft 21 feet deep with a drift 20 feet; only 12 feet be sunk the party of the first part shall pay but \$372, pay therefor to come from the sale of the land. Argeement made March 11, 1905 and extended to February 5, 1909.

Lease.—Mrs S E Stevens leases to George Yager et al 280 acres in 17-7-9 for five years at an annual rental of \$200.

Deeds—Arthur Lessley et al to the Amador Lumber Co., 160 acres in 5-7-14, \$10.

Louis V Oneto et ux to Guiseppe A Oneto, an undivided one-fifth interest in 480 acres in 7,17 and 18-6-12 and an undivided one-fifth life interest in buildings and improvements received from his father, \$10.

Virginia Profuma to Leigi Oreglia, lot 18 block 4, Drytown, \$150.

Mortgage—J J Pool to Andrew Bargala, 120 acres in 21 and 22-8-11, \$250, payable within two years, with interest at 8 per cent per annum.

Money Comes In Bunches

to A. A. Chisholm, of Treadwell, N. Y., now. His reason is well worth reading: "For a long time I suffered from indigestion, torpid liver, constipation, nervousness, and general debility," he writes. "I couldn't sleep, had no appetite, nor ambition, grew weaker every day in spite of all medical treatment. Then used Electric Bitters. Twelve bottles restored all my old-time health and vigor. Now I can attend to business every day. It's a wonderful medicine." Infalible for stomach, liver, kidneys, blood and nerves. 50c at Spagnoli Drug Store.

ANGELS RECORD- BREAKING SALE

How An Angel Camp Merchant Dodged His Creditors

(Angels Camp Record)

Angels Camp is becoming notoriously popular for bargain sales, closing out sales, sales at cost and less than cost; but the sale that eclipses them all, took place at the Oro store on Main street last Tuesday. The proprietor getting an inkling of an attachment to be served on him that night by city creditors, sought legal counsel and then proceeded to selling out regardless of cost or prices. The sale commenced at about ten o'clock in the forenoon and at five in the afternoon there was nothing left. The stock was valued at not less than \$2,500 and consisted mainly of furnishing goods. A large line of boots and shoes for men, women and children was carried, besides a lot of rubber and oil suits, notions, odds and ends. Everything went at general public sale. Articles worth \$5 were sold for \$1, and especially was this the case in the clearing out of the boots and shoes.

This was the quickest opened and closed sale ever known in the southern mines; no previous advertising, no bell-boy to cry public sale. The proprietor simply commenced selling valuable articles for almost nothing; the people caught on readily and rushed to him like a band of bulls to a red flag. It was the first place on record where the buyer could go in and plank down fifty cents on a five dollar article and walk off with the goods. Many having no money with which to buy shouldered in and shifted their old duds and donned new ones; the people flock about the front door like a herd of frightened sheep, the store being all the while packed with people; they went in at the front door and came out at the back door. Anyone who chose to constitute himself a clerk did so without authorization till there were not less than ten clerks doing the sale act, handing down the goods and taking whatever the buyer cared to pay. It appeared more like an effort on the part of the proprietor to free the building of the goods than to get anything approaching their value. A clear case of more goods than brains. While the sale was in progress the people were wild with excitement and hundreds of buyers got misfitting boots and shoes—odd numbers, two rights or two lefts, one of one make and the other of another make—but in the rush and jam these matters were not noticed, not till the sale was at an end. Now there is an effort among some of the buyers to find who has got the other boot or shoe to make his mate, ready to exchange to get a fit. The crowd surged forth and back till the plate-glass front was crushed in, in the frantic effort to get to the counters to buy with little capital. Finally the last remnant was sold and the crowd dispersed.

The proprietor then sold his safe for \$50. The buyer has since discovered that there are numerous installments still due on the safe which must be forthcoming before title can vest absolutely in himself.

The last seen of the proprietor that evening was at 9 o'clock, when he was gloriously steeped in the juice of the grape and was being hustled off to his lodgings by a friend.

Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Rev. Appleton Dies Suddenly

Returning from M. E. conference at Pacific Grove last Saturday evening, Rev. John Appleton was forced to take to his bed because of a very severe cold, and he grew gradually worse until Tuesday afternoon, when he passed away. The deceased had been resident pastor of the Methodist church at Georgetown for the past year, and was highly esteemed by all who had formed his acquaintance. Mr Appleton came from Bloomfield to Georgetown, and at conference last week he was returned to Bloomfield at the urgent request of the members of the church in that place. He was about 65 years of age, and leaves a wife and a married son, the latter residing in San Francisco, and Mrs Appleton was visiting there at the time of her husband's death, awaiting his return with their household goods. The remains will be taken to San Francisco and thence to Bloomfield for interment.

—Nugget.

Farmers, mechanics, railroaders, laborers rely on Dr. Thomas' Electric Oil. Takes the sting out of cuts, burns or bruises at once. Pain cannot stay where it is used.

The Second Guest

The North Pole Speaks to Lieut. Peary. Say that your name is Peary? Glad to see you, my friend; I don't see much of humans, here at the worlds' north end.

Sit you, and rest a minute, then we'll have a look at the sights; Dark, you say?—Excuse me, I'll turn on the northern lights.

Yes you are welcome, stranger, welcome within my gate,

Though as for being the first, my friend, you're really a trifle late.

Some time since another came up for to have a look—

Chap from your own part of the world—man by the name of Cook.

Now you can see about you. Hope you won't think me vain,

But that's some sight, I'm thinking, that million-year old morrain.

And here is my choicest iceberg—800 feet it stands—

I'll put it in competition with the best in other lands.

And now for a look at the glaciers—best in the world, it's said;

(Stoop low there under that big north star—there's a chance of bumping your head.)

That? That's a flag, they tell me—the stars and stripes; and look,

There's some records left by the traveler—man by the name of Cook.

CURE YOUR KIDNEYS

Do Not Endanger Life When a Jackson Citizen Shows You the Cure.

Why will people continue to suffer the agonies of kidney complaint, backache, urinary disorders, lameness, headaches, languor, why allow themselves to become chronic invalids, when a certain cure is offered them?

Doan's Kidney Pills is the remedy to use, because it gives to the kidneys the help they need to perform their work.

If you have any, even one, of the symptoms of kidney diseases, cure yourself now, before diabetes, dropsy or Bright's disease sets in. Read this Jackson testimony:

Mrs J. Cook, Broadway, Jackson, Cal., says: "I suffered from kidney trouble for a long time and nothing helped me until I procured a box of Doan's Kidney Pills at the City Pharmacy. I also had frequent dizzy spells and my kidneys did not act properly. I at length began using Doan's Kidney Pills and they gave me relief from the first. I was soon cured and my kidneys are now normal and my back stronger. I am only too glad to endorse Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Luck and the Woman

Every woman has her pet superstitions. Something to her, stands for luck—a horseshoe picked up, a four-leaved clover found, a pin gathered up from the floor, a black cat straying into the house, a birthday stone, a lucky date or number, etc. She believes in it because she can prove it to herself by definite examples, and in this she is usually correct. What she calls luck has really come to her the very day or week in which she has found the horseshoe or put on the birthday ring. It is not mere coincidence. It has happened as she says. The only thing she fails to see is just why and how it has happened.

The most important thing in life is one's attitude toward it, says Harper's Bazar. To the wrong attitude life brings nothing. To the right attitude it brings everything. The blind doctrine of luck is the handmaid of this clear truth. The woman who finds a four-leaved clover and is convinced that life holds something pleasant for her in the immediate future gets at once into the right attitude. She looks out for something good to come along and so she sees it and grasps it. If she had not found the clover and had gone dully and fretfully along instead, she would never have noticed the pleasant thing at all. That is the whole psychology of luck. It seems too simple to be true—but really its simplicity is its sign-manual of verity. Expect good, look for good, believe in good—and life becomes good and sorrows ever better. There are always opportunities along the daily road for the eye made keen by pleasant anticipation. Sometimes a big, happy coincidence comes along to boot, but whether it does or not there is enough daily "luck" on any woman's path to be more than worth her while.

Cats, clovers, pins and horseshoes are simply selected symbols of this steady and enduring truth, which needs none of them when once it is grasped and held by the woman who is wise.

ANY LADY can easily make for \$18.00 to \$25.00 per week working from me quietly in her own home locality. This is a bona fide offer—one which will pay you to investigate, even if you can only spare two hours per day. No investment required. Turn your spare time into money. Write me at once for particulars. Address HARRIET M. RICHARDS, Box 30, Woman's Building, Joliet, Illinois. jyl-71m

Lame Back

This ailment is usually caused by rheumatism of the muscles of the small of the back, and is quickly cured by applying Chamberlain's Liniment two or three times a day and massaging the parts at each application. For sale by Jackson Drug Store, Spagnoli, prop.

Red Meats.

"Red" meats are less liable to contamination than fish or chicken. The latter should not be eaten if there is the least suspicion of odor about them. Beef slightly tainted, though disagreeable, will not produce ptomaine poisoning.

The Largest Pearl.

The largest pearl known is two inches long and four round and is said to be worth \$250,000.

The Bed-Head of Success

lies in a keen clear brain, backed by indomitable will and resistless energy. Such power comes from the splendid health that Dr. King's New Life Pills impart. They vitalize every organ and build up brain and body. J. A. Harmon, Lizemore, W. Va., writes: "They are the best pills I ever used." 25c at Spagnoli Drug Store.

The Smallest Jail.

The smallest jail in the world is the old prison at Sark, in the Channel islands. The jail has but two cells.

Division of Time.

The Greeks and Romans had no weeks until they borrowed this division of time from the east. The Greeks divided the month into three equal periods, the Romans into three very unequal, the calends, ides and nones.

Broadcloth.

Broadcloth was first so called because it took two weavers side by side to ding the shuttle across it.

You need not be troubled in any way with the stomach, if you will simply take kodai at those times when you feel that you need it. Kodai is guaranteed to relieve you. If it fails your money will be refunded to you by the druggist from whom you purchased it. Try it to day on this guarantee. Sold by City Pharmacy, F. W. Ruhser, prop.

Chinese Ink.

Chinese ink is made by carbonizing a mixture of colza or sesame oil, varnish and lard and mixing the product with gum water and a little camphor and musk. The ink is pressed into molds to dry.

Cannon.

The first cannon to be cast in this place was made by an English iron-master in 1743.

Frightful Fate Averted

"I would have been a cripple for life, from a terrible cut on my knee cap," writes Frank Disberry, Kellier, Minn. without Bucklen's Arnica salve, which soon cured me." Infallible for wounds, cuts bruises, it soon cures burns, scalds, old sores, boils, skin eruptions. World's best for Piles. 25c at Spagnoli Drug Store.

A Historic Reef.

The Reef of Norman's Woe, made known to every schoolboy through Longfellow's "Wreck of the Hesperus," is but a short distance offshore from Rafe's chasm, near Gloucester, on the north shore of Massachusetts.

Babylon.

Babylon was probably the first city in the world with a population of 1,000,000.

For Chronic Diarrhoea

"While in the army in 1863 I was taken with chronic diarrhoea," says George M. Felton of South Gibson, Pa. "I have since tried many remedies but without any permanent relief, until Mr A. W. Miles, of this place, persuaded me to try Chamberlain's Colic, Cholera and Diarrhoea Remedy, one bottle of which stopped it at once." For sale by Jackson Drug Store, Spagnoli, prop.

Seek Their Color.

Divers in the clear waters of the tropical seas find that fish of different colors when frightened do not all dart in the same direction, but that each different kind takes shelter in that portion of the submarine growth nearest in color to that of the fish.

The Earliest Fan.

Perhaps the earliest fan in history was mentioned in hieroglyphics deciphered by the Egyptologist, Lepsius. In his researches he found this sentence referring to Osiris, "In his hand he held a fan."

A Curious Fly.

A curious lantern fly discovered by naturalists in the Malay archipelago possesses the power of jumping a distance of several feet without opening its wings. It has a projection on its head which, when bent back and suddenly released, throws the insect into the air. This fly was seen to jump from the ground to the roof of a hut.

Bilious? Feel heavy after dinner? Tongue coated? Bitter taste? Complexion sallow? Liver needs waking up. Doan's Regulents cure bilious attacks. 25 cents at any drug store.

Blood Heat.

Blood heat, the normal temperature of the human body, is about 98½ degrees F. This is known as blood heat and is maintained within one or two degrees, whether in the arctic or the tropical regions. Any deviation from the average is injurious and if it be great or long continued is likely to prove fatal.

Peat Alcohol.

Alcohol is obtained from peat by treating the fiber with sulphuric acid and fermenting with a special yeast. A ton of dry peat yields forty-three gallons of pure spirit at one-fourth of the cost of potato alcohol.

Why Colds are Dangerous.

Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germs that would not otherwise have found lodgment. It is the same with all infectious diseases. Diphtheria, scarlet fever, measles and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade over a large part of the world. For sale by Jackson Drug Store, Spagnoli, prop.

What Colors Typify.

In ancient times green signified for men joyousness, transitory hope and the decline of friendship, and for women unfounded ambition, childish delight and change. The early venture of spring might be regarded as at once a symbol of hope and of eventual disappointment, for it must soon pass away. Mercury and Wednesday, the day of Mercury, were both typified by green, the sly fox being selected as the animal in sympathy with the wily god. The typical green stone is the emerald, youth is the age of man represented by the color, and five the magic number expressing it.

Green was used in the case of those who died in the flower of youth, an emerald being sometimes placed on the index finger of the corpse as a sign that the light of hope was spent; for the lower part of the torches used in religious ceremonies was marked with green. Falsius Pellegrinus relates that in the tomb of Tullia, the dearly beloved daughter of Cicero, there was found an emerald, the most beautiful that had ever been seen. This passed into the hands of the Marchesana di Mantova, Isabella Gonzaga d'Este. In Italy the graves of young virgins and of children were covered with green branches. When the Codex Justinianus was re-discovered and added to the other Pandects, it was bound in green to signify that these laws were rejuvenated.

Black for men means gravity, good sense, constancy and fortitude; for young women, fickleness and foolishness; but for married women, constant love and perseverance. The planet Saturn and Saturday are denoted by black. Strange to say, the diamond, the white gem par excellence, was selected to represent this somber hue. Perhaps to offset this the animal chosen was the hog. As black was a mourning color, we need not be surprised that it typified decrepitude. The number eight, the double square, was supposed to have some affinity with black.

Black was a symbol of envy, for the thoughts which aim at another's injury, cloud the soul and afflict the body. The book of laws treating of dispositions made in view of death was bound in black. The sinister significance of black is well illustrated by what is told of the ruthless Tartar Tamburlaine. When he attacked a city he caused a white tent to be pitched for himself on the first day of the siege, as a sign that mercy would be shown to the inhabitants if they immediately surrendered; on the second day a red tent was substituted, signifying that if the city yielded all the leaders would be put to death; on the third day, however, a black tent was raised, an ominous signal that no mercy would be shown and that all the inhabitants would be slaughtered.

Violet for a man denoted sober judgment, industry and gravity; for a woman, high thoughts and religious love. It was the color of the planet Jupiter and of Thursday. As with blue, the sapphire was conceived to present violet most attractively. That the bull should be selected as the animal represented by this color probably arose from some mythological connection with Jupiter, possibly the myth of Europa and the bull. Violet was the color of old age and was associated with the number three.—From the Saturday Evening Post.

When You Think

Of the pain which many women experience with every month it makes the gentleness and kindness always associated with womanhood seem to be almost a miracle. While in general no woman rebels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subdues inflammation, heals ulceration and cures female weakness.

Sick women are invited to consult Dr. Pierce by letter, free. All correspondence strictly private and sacredly confidential. Write without fear and without fee to World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

If you want a book that tells all about woman's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers. In handsome cloth-binding, 31 stamps.

IN CASE OF FIRE.

How to Save Property and Escape From a Burning Building.

One's ability to extinguish a starting fire or to escape if caught in a burning building depends upon intelligence and self control. If the blaze is just starting throw water on the material that is burning—not at the blaze. One bucket of water will do more good if thrown on by handfuls or with a broom than if dashed on at once. A small fire may be smothered with a rug or blanket or beaten out with a broom.

If you cannot put out the fire in a minute yell "Fire!" and then, if in a city, call the fire department. Every one living in the house should know the telephone number to be used for getting the firemen, and it should be on the wall for strangers to use. There is no time for looking in the directory, even if one should not be too nervous to find a number. Every one should know where the nearest fire alarm box is and how to use it.

Do not leave the door open when you run out to give an alarm. If the doors and windows are closed when a fire starts one can always get the firemen there in time to put it out while it is in only one room. The fire soon consumes all the oxygen in a closed room and may die out if it gets no fresh air.

If awakened in the night by the smell or cry of fire, don't dress. Wrap yourself in a blanket or quilt from the bed and get out the quickest way you can. Shut the doors you pass through. After calling for help try to ascertain the extent and the situation of the fire. You can tell if it is best to try to carry out the household goods. If the fire is on the first floor it is very dangerous to go above, because the heat and choking smoke rise.

One can often get out through a hall filled with smoke by going on his hands and knees when he would fall choking if he ran. The smoke is the thickest at the ceiling. Holding a wet towel or anything made of flannel or even a coat collar over the mouth greatly lessens the danger of injury to the lungs or death from the carbonic acid gas in the smoke.

Most fires start in the first floor or basement of a building and burn a hole up through the roof. In a house the flames travel by the stairways; in a big store or hotel they go quickly up the elevator shaft. After reaching the top the fire spreads and slowly goes down.

How to Care For Leather Furniture.

Most housekeepers regard their leather furniture as a thing to be dusted only and left to its fate. There never was a greater mistake. The leather needs constant and intelligent care to keep it from drying out and tearing into shreds or turning to powder. All leather needs care and furniture covering most of all. In the first place, don't be afraid to apply a little soap and water to it to wash off the dust and dirt. Use soapy water, a sponge and a paint brush to get into the folds of the leather and the crevices. The soapy water will darken the leather, but only temporarily. When the leather is dry here is a preparation that will do it good. It's simply just one part sweet oil and four parts benzine. The oil will darken the leather a little, but it will soon dry in and leave it the original color. The surplus oil may be removed by rubbing. Rub into the grain of the leather. This treatment four times a year will preserve both the life and the elasticity of leather furniture covering.

How to Clean White Felt Hats.

One girl whose income is so small that her friends wonder how she can afford to wear the light colored hats that are so becoming to her keeps them clean with artist's chalk. She lays in a supply of this chalk, which can be bought for a few cents and in different colors. Should a spot appear in a pink hat, for instance, it is immediately covered with pink chalk and laid in a dark place for several hours or, better yet, overnight. When the chalk was brushed off the spot usually comes along. A milliner is responsible for a somewhat heroic treatment of light felt hats. She says that when they become dirty she always rubs the surface with the finest sandpaper that can be found. Strange to say, this does not roughen the felt and does remove the dirt.

How to Make Gruel For Invalids.

Comparatively few cooks know how to make appetizing and wholesome gruel for invalids. One that is particularly nourishing and may be quite delicious is made from sago. Put two tablespoonfuls of sago into a double boiler and add a pint of cold water. Boil until it thickens, stirring constantly to prevent lumpiness or burning. Just before taking from the stove add a little sugar if sweetening is liked, and when cold flavor it with a tablespoonful of sherry. If wine is not used a little nutmeg can be sprinkled over the top before serving.

How to Make Pastry Shells.

An easy way to bake shells of pastry for pies or tarts is to fit the pastry over an inverted pie or gem pan. Prick the crust with a fork in several places to keep it close to the pan. Bake in a quick oven. It can easily be turned on to a plate for filling and has the advantage that any desired depth of shell can be easily managed.

How to Preserve House Plants.

Save all water in which meat has been washed to water house plants. It is an excellent fertilizer. A dying palm and several ferns were wonderfully revived by pouring about a teaspoonful of castor oil on the soil around the roots.

SCIENTIFIC MISCELLANY

Reported weekly for the Ledger.

Electric Body Heat—Whale Mates That Death Does Not Separate—Paper Carpets—An Earthquake Alarm—Wood Casting—Vibration in Moving Pictures—A Pocket of Carbonic Acid—Voting in One Second—Light Without Matches.

Heating the tissues of the body by the passage of very rapidly alternating currents is the novel idea lately introduced into electrical therapeutics by Drs. Von Preys and Von Bernd, of Vienna. In a process called fulguration, physicians in France and elsewhere have been for some years using for medical purposes glow discharges from highly-charged induction coils, and the superficial burning or heating has hastened the healing of cancers after operation and otherwise given good results. For the new method, to be known as thermo-penetration, Siemens and Halske have constructed a simple combination of two coils that gives a current of very rapid oscillations and adjustable strength. The terminals are applied to the part of the body to be heated, so that the current flows into the body directly, instead of through an air-space as in fulguration, and the internal temperature is raised by resistance just as a lamp filament is heated. This is the first effective application for increasing bodily temperature. The sensation is an agreeable warmth without pain, and important curative effects are expected, especially in such cases as cancer.

A species of whale that seems to commit suicide has been brought to the notice of the Paris Academy of Science by Edmund Perrier. These whales are 16 feet long, have only two teeth, and are so rare that only 28 have been known, only a single specimen having been preserved. They come ashore only in pairs, and if either male or female is killed, the death of the other promptly follows.

Mills for spinning yarn from paper exist in Germany and France, and another is being established in southern Sweden. The paper yarn seems to be especially adapted for rugs and carpets. Carpets from inspun paper tape are being made already in Sweden, and Consul-General E. D. Winslow reports that this home-woven product is apparently very satisfactory.

The uneasiness of animals before earthquakes has suggested to A. Maccioni, an Italian, that the nervous system may be affected by electric waves coming from earthquake centers a little in advance of the mechanical shocks. Acting on this theory, he has devised a detector for such waves, using a coherer sensitive to all wave-lengths, which is connected by wire to an upright metal late in the ground, and is in circuit with a battery and a sensitive galvanometer or relay. When electric waves from the earth are received, the relay closes the circuit of a strong battery acting upon a registering mechanism, a clock and a bell. Recording the ordinary mechanical shocks by means of a very sensitive seismograph, two earthquake movements were observed on April 14, and it was found that from a centre of disturbance fourteen miles away the electric waves were made known four minutes before the arrival of the mechanical waves. Though the new instrument is being first applied to earthquake study, it should prove of life-saving value in giving warning of dangerous shocks.

"Melted wood," first produced 17 or 18 years ago, was forgotten after having been recorded as a scientific curiosity. Francis Marre reports that further experiments have been lately made in France, and that after the volatile substances have been distilled from wood chips, the fibrous skeleton and the mineral salts are heated in a boiler to 1500 deg. F. for two hours, in an atmosphere of somewhat compressed nitrogen. The exclusion of oxygen prevents combustion. The mass thus obtained is hard and homogeneous, but the melting can be performed without drawing off the distillation products, and then the fused wood becomes a hard amorphous solid, with a fine grain, and taking a fine polish. The new material, which can be cast and molded and made indelible by preservatives, seems to be adapted to many uses.

The fatiguing effect of moving pictures thrown on a screen is not due to the passage of the film itself, but is produced by the shutter that repeatedly cuts off the light during the motion of the film. The painful vibration has been remedied by running the shutter motor four times as fast, cutting off the light 56 times a second instead of 14.

A French coal-mine has been remarkable for its emissions of carbon dioxide. The most violent outburst occurred in July, 1907, and immediately followed the explosion of five pounds of dynamite in eight blasts in a seam of coal at the bottom of a shaft 1,000 feet deep. Dust in great quantities was thrown out for an hour and a half, the outflow of

gas continuing twelve hours. Three workmen were suffocated, occupants of neighboring houses showed symptoms of asphyxia, and over an area of country about 3,300 feet long and 1,600 feet wide, chickens, dogs and birds were killed by the gas. From the surface of the ground 523 tons of very fine coal dust were collected, the wind having probably carried away as much more. The dust covered the machine room, sixty feet from the mouth of the shaft, to the depth of a yard, and penetrated to workings 500 feet from the shaft. From the various galleries of the mine nearly 1,800 tons of coal dust were taken. The coal seam penetrated was about sixty feet thick, and the great quantity of gas liberated has been attributed to this unusual thickness and the large area covered by the simultaneous blasts.

The "Psephographe," the new voting machine that has been attracting much favor in Italy, is about two feet and a half high, and has slots in the back for receiving votes, which are cast in the form of heavy discs. As a disc drops, it is recorded in the corresponding section in the front of the machine. Votes may be cast rapidly, and totals are accurately shown without delay for counting. With about one vote a second, it is estimated that two machines—one for "ayes" and one for "noes"—would record the 670 votes of the British House of Commons in six months. The vote of the stonemasons of Milan on the question of a strike was taken within an hour.

The "Selflight," a self-lighting cycle lamp, makes a modern use of the old flint and steel. Turning on water generates acetylene from the calcium carbide, and as soon as the emission is sufficient, a trigger is released that sends a shower of sparks across the burner, igniting the gas. The lighting device is simply a piece of file steel arranged to produce sparks by striking a piece of flint.

About Right.

"What may I expect as pay for that poem?" asked the hopeful young man. "Well," said the editor, glancing at it again, "how would a penny for your thoughts suit you?"—Kansas City Times.

Contentment.

I love the game as it is played,
And yet the palm I yield,
I'd rather lounge within the shade
Than roam upon the field.
—Cleveland Plain Dealer.

Poultry Note.

"So you are raising chickens?"
"Yes," answered Mr. Crosslots.
"What do you find the greatest menace to the welfare of poultry?"
"Sunday company."—Washington Star.

Just a Little Rhyme.

The automobile goes its way,
'Tis swift and bright and chuggy.
But I've no use for any day
That folks describe as muggy.
—Cleveland Plain Dealer.

All Are Not Useless.

"A drowning man will catch at a straw."
"Yes, especially a man who is drowning his sorrows."—Baltimore American.

Again.

His brow is wet with honest sweat;
His face with dust is gray;
His lips are muttering "Never again!"
His family moved today.
—New York Evening Telegram.

Exact Location.

Hank Stubbs—Cucumbers never hurt me in the world.
Bigge Miller—Waai, thet ain't where they hurt me neither."—Boston Globe.

Different Curiosity.

We wonder as Mars comes in view
If there are souls up there.
The men all wonder what they do,
The women what they wear.
—Chicago News.

A Fleeting Joy.

"The summer girl is a myth."
"Not until the season's over."—Boston Globe.

A Contrast.

Norwegians and Lapps, the tallest and the shortest peoples of the world, live side by side.

"A Little Bird Told Me."

The common saying, "A little bird told me," has its origin in the Bible. In Ecclesiastes x, 20, we read, "Curse not the king, no not in thy thought, for a bird of the air shall carry the voice, and that which hath wings shall tell the matter."

Red Hickory.

Well seasoned red hickory weighs 52.37 pounds to the cubic foot.

The Dahlia.

One of the tales told of the dahlia is that the flower ornamented the royal gardens of the Escorial at Madrid for several years before Spanish jealousy would allow it to be introduced into the other countries of Europe.

Zulu Endurance.

The rate at which Zulus can travel in an emergency is astonishing. Some will cover as many as fifty miles in six hours. Eight miles an hour is an ordinary pace.

A Turtle That Eats Grass.

The *Xerobates agassizii*, the grass eating turtle of the Mojave desert, is said to be the only one of the turtle species which lives by grazing like a horse or an ox. *Xerobates* digs a hole in the sand to escape the intense heat, is about ten inches in length when full grown and weighs from six to eight pounds.

The Churchyard Beetle.

In Sweden the churchyard beetle is regarded as a messenger of pestilence and death, and its appearance always excites violent alarm. A species closely allied is eaten by Egyptian women with a view to acquiring plumpness.

Don't think that piles can't be cured. Thousands of obstinate cases have been cured by Doan's Ointment. 50 cents at any drug store.

BY SPECIAL ARRANGEMENT WITH

THE SAN FRANCISCO

BULLETIN

San Francisco's Leading Daily, the

AMADOR LEDGER

Is enabled to offer old and new subscribers

Amador Ledger - Weekly, \$2 per year
The Bulletin - Daily, \$3 per year
FOR \$3.00 Per Year

This is an extraordinary offer, and may be withdrawn at any time, so we would suggest that all old subscribers in arrears pay back accounts that they may take advantage of this special combination sale.

THE BULLETIN is famous from coast to coast for its fight in defense of clean government, and is read by more people daily than the combined circulation of all other San Francisco dailies.

You will appreciate the value of this offer when you consider that any of the other San Francisco papers will cost you \$8 per year.

SLIPPED OVER
A PRECIPICE
Cecil Miller Fell 75 Feet
Over Cliff, and Dangerously
Hurt.

An accident occurred near Plymouth last Sunday which is apt to have a fatal ending, the unfortunate victim being a boy named Cecil Miller, about 16 years of age, a resident of Plymouth. On the day named Miller, with a companion named Summers, a son of A. B. Summers, started out on a hunting excursion. They traveled toward the Cosumnes river, to the ranch of L. Burke, about three and a half miles from Plymouth. There is a bluff called Eagle's Nest, with an almost perpendicular descent to the river of over 1000 feet. While attempting to climb down at this point, Miller stepped on a large flat loose rock, which tilted with his weight, and he slid on the rock over the chasm.

His companion was horrified to see him go over the bluff. Looking down he could see no sign of him. He could do nothing alone. He hastened back to Plymouth with all possible speed, and reported the occurrence. A posse was quickly organized and set out for the scene, with wagon, a coffin—for it was assumed that the victim was killed—and ropes to lower the rescuers to the river if necessary. Reaching the spot parties were lowered by means of ropes, and it was discovered that young Miller did not fall clear to the river bed. He was found on a ledge some 75 feet below where he fell. He was alive, but unconscious. It was a difficult and dangerous task to get the injured victim to the surface, the work consuming several hours. It was accomplished without further mishap, the rescuing posse working as if the life of the boy depended upon their efforts. The coffin box they took along was of material service in the operations. It was after one o'clock Sunday morning when the posse got back to Plymouth with the still unconscious Miller. Dr. W. A. Norman was on hand to attend him. An examination was made, and it was found that one ankle was fractured, and bruises about the head and other parts.

On Wednesday he was taken to the Sutter Creek Sanitarium, still in an unconscious condition. His recovery is very problematical.

Most women are troubled with kidney complaint, and you know very many serious and even fatal diseases result from these neglected kidney troubles. If you take De Witt's Kidney and Bladder Pills as directed, you may be confident of good results. Try them and see how really good they are. Beware of imitations, pills that are intended to deceive you. Be sure you get De Witt's. Sold by City Pharmacy, Ruhser, prop.

Jackson Gun Club

A gun club was organized in Jackson on Wednesday evening of last week, with between 50 and 60 members. Vic Rocco was elected president and J. S. Garbani secretary. This organization was effected in deference to the rules of the state fish and game commissioners in shipping the consignment of quail to this section, as reported last week. The commissioners will not send out birds for restocking purposes to any point, unless there is formed an organization for the protection of game birds. It was to get in line with this regulation that the gun club is organized. The club will be charged with the duty of looking after the quail turned loose on several thousand acres of land in the vicinity of Butte mountain. The members of the club will have no special privileges in regard to shooting within the limits of the game preserve. Hunting of any kind will be absolutely prohibited by the respective land owners for a number of years. When the closed season is ended, which is not likely to be before three or four years at least, all parties will be on an equality, whether members of the club or not.

Classy Photo.

It takes fine workmanship, experience and the best of apparatus to turn out a "Classy Photograph" in these days of strenuous competition. Of course when you have your picture taken you want the very best, especially when the best costs no more than work of inferior quality. LOGAN, the premier photographer of Stockton, is fully prepared to give you this better class of Photo's. Visit his studio at 15 S. San Joaquin St., Stockton, when you are in town.

Want to be Citizens

Pietro Salvi Guiseppe Bianchi, Guiseppe Casazza and Antonio Massoni of Italy, Sarah Swain of England and John Gogrophos of Greece filed their declarations of intention to become citizens of the United States with the county clerk during the month of September. Giuseppe Buonaccorsi of Jackson has filed his petition for naturalization.

Children Cry
FOR FLETCHER'S
CASTORIA

G. F. DORNAN'S
REOPENING

On or about the 7th of Oct. we expect to re-open our store with a new and up to date stock of Ladies', Gents' and Children's Furnishings.

We have a large line gents' ready to wear clothing which are displayed on the latest rolling display racks, colors and prices to suit all.

Funston cloth pants—something new.

Sole agent for Dr. Read's Cushion Sole Shoes, for tired and aching feet.

We have arch supports, insoled soft spots, the celebrated English Cork Soles.

The everlasting steel heels.

Miners cloth boots, shoes and umbrellas.

A \$100 Typewriter
for 17 cents a Day

Please read the headline over again. Then its tremendous significance will dawn upon you. An Oliver Typewriter—the standard visible writer—the 100 machine—the most highly perfected typewriter on the market—yours for 17 cents a day!

The typewriter whose conquest of the commercial world is a matter of business history—yours for 17 cents a day!

The typewriter that is equipped with scores of such conveniences as "The Balance Shift," the "Ruling Device," the "Double Release," the "Locomotive Base," the "Automatic Spacer," the "Automatic Tabulator," the "Disappearing Indicator," the "Adjustable Paper Fingers," the "Scientific Condensed Keyboard," all

Yours for 17 Cents a Day!

We announced this new sales plan recently, just to feel the pulse of the people. Simply a small cash payment, then 17 cents a day. That is the plan in a nutshell.

The result has been such a deluge of applications for machines that we are simply astounded.

The demand comes from people of all classes, all ages, all occupations.

The majority of inquiries has come from people of known financial standing who were attracted by the novelty of the proposition. An impressive demonstration of the immense popularity of the Oliver Typewriter.

A startling confirmation of our belief that the Era of Universal Typewriting is at hand.

A Quarter of a Million People are
Making Money with

The
OLIVER
Typewriter

The Standard Visible Typewriter

The Oliver Typewriter is a money-maker, right from the word "go." So easy to run that beginners soon get in the "expert" class. Earn as you learn. Let the machine pay the 17 cents a day—and all above that is yours.

Wherever you are, there's work to be done and money to be made by using the Oliver. The business world is calling for Oliver operators. There are not enough to supply the demand. Their salaries are considerably above those of many classes of workers.

An Oliver Typewriter in every Home
That is our battle cry today. We have made the Oliver supreme in usefulness and absolute indispensable in business. Now comes the conquest of the home.

The simplicity and strength of the Oliver fit it for family use. It is becoming an important factor in the home training of young people. An educator as well as a money maker.

Our new selling plan puts the Oliver on the threshold of every home in America. Will you close the doors of your home or office on this remarkable Oliver opportunity?

Write for further details of our easy offer and a free copy of the new Oliver catalog. Address

MANUFACTURERS SHOES SAN FRANCISCO

WHEN YOU BUY A SHOE

You want Reliability

You want Comfort

You want Wear

You want Satisfaction

For 50 years we have manufactured shoes on the Pacific Coast. Your shoe bill at the end of the year will be less and your satisfaction greater if you purchase honestly made shoes that are carefully inspected before being shipped. Look for our name on every pair; it means money saved for you.

Celebration of the Sixtieth Anniversary of the

RUSH OF '49

Stockton, Oct. 26-30, '09

Historical Reproduction of the

"Days of old,
Days of gold,
Days of 49."

History of the Golden State from '49 to '09 in Five Spectacular Chapters.
Parades, Barbecues, Dance Halls, Chinese Theatre and Free Shows.

One of Shaw's Criticisms.

"Before fame came to him," said a playwright, "that great rival of mine, George Bernard Shaw, wrote theatrical criticisms for the London Saturday Review. Now, those were criticisms indeed. Nobody could praise a good play so beautifully as this critic. Nobody could roast a bad play so tellingly. Listen. Here is a sample."

And the playwright read:

"I am in a somewhat foolish position concerning a play at the Opera Comique, whither I was bidden this day week. For some reason I was not supplied with a program, so that I never learned the name of the play. At the end of the second act the play had advanced about as far as an ordinary dramatist would have brought it five minutes after the first rising of the curtain, or, say, as far as Ibsen would have brought it ten years before that event. Taking advantage of the second interval to stroll out into the Strand for a little exercise, I unfortunately forgot all about my business and actually reached home before it occurred to me that I had not seen the end of the play. Under these circumstances it would ill become me to dogmatize on the merits of the work or its performance. I can only offer the management my apologies."

How to Keep Ferns in Good Condition.

Ferns should not be placed in halls or situations exposed to drafts. They require great care in watering. People often think they have watered their plants when the water has only gone over the surface and around the sides of the pots, the center of the ball being still quite dry. This is especially the case when the pots are filled with roots. It is necessary that the ball should be thoroughly soaked. There is no regular rule as to the time for watering. Plants in vigorous growth require more frequent watering. Evaporation also has much to do with it. On dry, warm days, when evaporation is great, water may be needed twice a day, while if the air is cool and moist two or three days might intervene without water. A healthy, vigorous plant absorbs much water, while a delicate one can absorb but little. The soil should be examined always and if dry watered; if not, refrain from watering. When leaves shrivel and turn yellow the soil has been too dry. If they turn yellow without shriveling it indicates too much water has been given. In either case the roots have been abused and lost their power of absorption.
